

HÖRMANN

A FAMILY BUSI-
NESS
IN EUROPE
AND AROUND
THE WORLD

HISTORY

Founding of the company. Hörmann has been a family-owned business for four generations. August Hörmann, who already had roots in the craft of door-making and founded the Bielefeld Steel Doors Factory in 1935, was known for his passion for technology and keen eye for quality – characteristics that brought him success. Within a few years, Hörmann became a regional supplier of modern steel doors.

In 1935; August Hörmann (1886 – 1944) founded the Bielefeld Steel Doors Factory.

The next generations. From 1944, August Hörmann's son Hermann was at the head of the company, which had meanwhile moved to Steinhagen near Bielefeld. In 1963, Thomas J. Hörmann, a member of the third generation, joined the company, followed later by his three brothers. From 1990 onwards, Thomas J. Hörmann managed the company together with his father, before taking sole control in 1994. In 1990 and 1992, his sons Söhne Martin J. and Christoph Hörmann also began to take on responsibility, joining their father in the company management as personally liable partners in 2006. Since 2024, Martin J. and Christoph Hörmann have been the fourth generation to be at the head of the family business.

Hermann Hörmann (1912 – 1994) shaped the business for decades.

Thomas J. Hörmann (1939 – 2024) shaped the group of companies for over 60 years

*Today, the fourth generation is responsible for the company.
Martin J. Hörmann (left) and Christoph Hörmann (right).*

New start after the war – the first up-and-over garage doors were delivered by Hörmann in 1952.

Ascent with the up-and-over garage door. After the Second World War, Hermann Hörmann put the company on the path to success. While established manufacturers did not recognise the signs of the times, Hörmann seized the opportunity and launched the up-and-over garage door. In the years of the economic miracle, the innovative door developed into a bestseller, and Hörmann quickly rose to become the leading German garage door manufacturer.

Hörmann conquered the German market with the up-and-over garage door.

In the early 1960s, a second Hörmann location was established in Freisen, Saarland.

Hörmann presented the new sectional door at the Hanover Exhibition in 1970.

The Hörmann Group. From the 1960s onwards, further company locations were established. New products such as fire-rated doors, door frames and sectional doors were a great success. An important contribution was made by the completely restructured sales, with a central sales company.

Expansion and diversification. From the late 1980s onwards, Hörmann was able to acquire major building component manufacturers in Germany and Europe, in addition to its own expansion. In addition, the group expanded after German reunification with sales and production locations in the new federal states.

On the road to the future. Since the beginning of the new millennium, important steps have been taken for the future. Today, Hörmann not only manufactures in Germany and Europe, but also in America and Asia. In addition, the company was able to develop further product areas such as storage space systems and perimeter protection systems. Courage and passion – principles that already determined the actions of August and Hermann Hörmann – are crucial to our success.

Find out more about our history at
www.hoermann.com/en/history/

Hörmann already established a factory in China in 1998. Today, the Westphalian company has three production sites there.

GROUP OF COMPANIES

Strong together. Our headquarters are located in Steinhagen, a municipality in East Westphalia near Bielefeld. From here, we operate worldwide with 100 individual sales locations in more than 40 countries and with partner companies in over 50 other countries. Our independent subsidiaries operate autonomously, flexibly and close to the market.

Over 6000 employees work in over 40 specialised factories in Europe, America and Asia to develop and produce high-quality doors, frames and operators, as well as perimeter protection and storage space systems, for use in private, public, industrial and commercial properties.

Courage, passion and the interplay of entrepreneurial activities – these are our strengths. Together, we generate annual sales of more than €1 billion as the Hörmann Group.

BUSINESS AREAS

Whether quality or innovation, safety or aesthetics – our products and our service meet the highest demands.

We do not compromise.

This is something our customers know. They trust us. And have done for decades.

PRODUCTS FOR RESIDENTIAL CONSTRUCTION

Entrance doors and garage doors with matching appearance blend harmoniously into the architecture of detached houses.

Automatic garage doors with operators enable convenient access to garages

Convenient control via smartphone or tablet with our Smart Home system

Timber doors and loft doors create a modern living atmosphere.

Our storage space systems offer plenty of space in the garden.

PRODUCTS FOR CONSTRUCTION PROJECTS

Glazed box frame doors lend transparency to the architecture.

High-quality, safe and tailor-made – our steel doors meet the highest demands.

Insulated doors for cold and deep freeze rooms are used in the catering and food industries

Timber doors combined with steel frames are a durable and hard-wearing solution for hotels

PRODUCTS FOR COMMERCIAL AND INDUSTRIAL CONSTRUCTION

Commercial and industrial customers rely on our proven and innovative industrial doors.

In addition to industrial doors, Hörmann also offers trailblazing loading technology.

Perimeter protection systems guarantee security and flexibility.

Sliding doors and high-speed doors are used in production and logistics halls.

Our barriers can be used in a variety of ways.

SERVICE

Our network of over 500 service technicians in Europe guarantees speed and flexibility.

Proper use and regular maintenance increase the long service life of our products.

Our technicians are available in many countries on seven days a week and around the clock.

Technicians certified by us know exactly what to do. After all, no one knows our products better than us.

OUR EMPLOYEES

Partnership. Our employees are the foundation of our success. Their expertise and motivation are our capital. But we also know that cooperation is crucial. If a company focuses on respect, cooperation, passion and courage, it will get a lot in return. It starts with loyalty and creativity and does not stop there. Partnership is a value. But it is also a principle that leads to success. As a traditional family-owned business we know what we are talking about.

Opportunities. Our employees work for a broad-based company. The product range extends from doors to logistics and perimeter

protection systems. We manufacture on three continents and have sales offices in more than 40 countries. Hörmann offers a variety of fields of activity, and our employees can pursue a career in East Westphalia, but also in China. The tasks are varied and demanding, and they are constantly changing. That's why training is so important to us. This is why the Hörmann Akademie with its wide range of training seminars was established. We need competent employees as they are a crucial pillar of our success.

www.hoermann.com/en/careers/

Respect, commitment and courage are crucial for successful cooperation

Regular training means our employees have everything under control, even in IT and digitalisation.

Our highly qualified employees ensure that customers receive the best product.

We develop the best solutions to meet new technical challenges.

In the factories, perfectly planned processes ensure that products reach customers quickly.

OUR VALUES

Our values have always been a strength of our family-owned company. They are our compass, guiding and supporting us every day.

Respect.

Respect is our highest asset and non-negotiable, because respect is the foundation of our daily work. Whether among ourselves or in our dealings with partners and customers, we stand for cordiality and cooperation based on partnership.

Collaboration.

We share the deep conviction that together we are stronger than any individual alone. Our employees bring a variety of experiences and perspectives to the table, enriching our team and making exceptional performance possible.

Passion.

Passion drives us to give our best every day. Personal commitment, enthusiasm and enjoyment in our work for our company lead to remarkable results.

Courage.

We want to create an environment in which all employees feel empowered to use their own decision-making freedom and take responsibility.

Find out more about our values at
www.hoermann.com/en/careers/

FACTORIES

Our product range is wide. And consistent. We manufacture at numerous locations on three continents. In highly specialised factories using state-of-the-art production technologies.

PRODUCTION

On three continents. The factories are the life blood of the Hörmann Group. This has always been the case. The rise began with Amshausen, resulting in one new location after another being established. Hörmann began producing in Belgium as early as 1963, and three decades later internationalisation gained momentum. Factories in America and Asia were added. Now we manufacture on three continents. Hörmann is an East Westphalian family-owned business, but also a globally active group.

Always put to the test. Hörmann has always invested in manufacturing – in buildings, in state-of-the-art machines, in optimised production processes. Our factories are our focus and are always put to the test. After all, time never stands still. We continuously analyse and improve the processes and invest in state-of-the-art technologies. The specialisation of the factories and their independence also secure our competitive edge. The goal is having the best products and the most efficient production processes, optimal working conditions and environmentally friendly manufacturing processes. Everyone benefits from that.

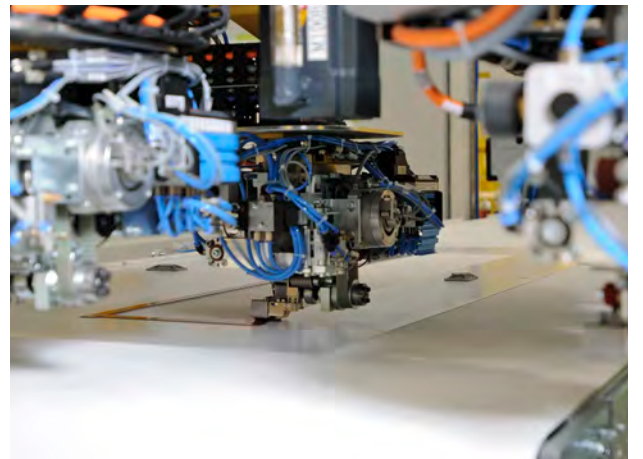

Galvanised steel doors on their way to powder coating

Efficient manufacturing through continuous investment in production facilities.

The quality of our products secures our competitive edge.

Modern technology for precision down to the smallest detail.

We conform to the highest safety standards and optimum working conditions, while also ensuring efficient production processes.

Production begins with the steel coil and ends with the finished door.

Globally uniform standards guarantee uncompromising quality.

Automated production ensures efficiency and guarantees the highest product quality.

Storage in high-bay warehouses enables fast delivery times.

Selected raw materials form the basis for our high-quality products.

The products then leave the warehouse and reach our customers.

The modern production lines of Hörmann factories guarantee optimal production processes.

INNOVATIONS

A leading edge through innovation. For us, this is not a marketing slogan but an entrepreneurial reality. This has been the case for many decades, ever since we developed the up-and-over garage door. The innovative product was significantly improved by Hörmann in the 1950s. Later, the finger trap protection on the sectional door or the wicket door with trip-free threshold were added. The quest for perfection has brought us numerous patents and it has made us successful.

Functionality and safety. Our innovations are never an end in themselves, because functionality and safety are always our top priorities. Our Duradecor surface finish, for example, gives residential internal doors elegance and robustness. The door operator PortaMatic provides living comfort. In addition, our extremely secure radio system BiSecur allows the convenient operation of doors. Industry customers appreciate the Soft Edge technology, which prevents damage to high-speed doors with flexible door leaves, and rely on the easy-to-install shaft operator WA 300. We offer many innovative products. And we are already working today on the innovations of tomorrow.

SUSTAINABILITY

Responsibility. Hörmann is a family-owned business. This is our commitment to both previous and future generations. That's why environmental responsibility plays such an important role for us. But Hörmann is also an innovative company and innovative solutions are crucial for intelligent environmental protection. We think and act green! Our sustainability strategy aims to reduce and avoid emissions.

For a clean future. We have already achieved a lot. Today, climate protection is the focus of our efforts. We cover 100% of our electrical power needs at all European production sites with genuine green electricity from renewable sources (excluding France, where we use electricity generated by nuclear power). We also apply many other measures to reduce our consumption and save more than 75000 tonnes of CO₂ each year. We will continue our efforts for a clean future – we owe it to future generations.

CO₂-neutral products. Since it is not yet possible to prevent all emissions, we work with ClimatePartner to offset the remaining emissions by supporting certified climate protection projects. This is why we are currently able to offer all our products for residential construction as CO₂-neutral as standard. In Germany, our products for construction projects are also available as CO₂-neutral versions upon customer request. In this way, customers have the option to offset remaining emissions and make a contribution to climate protection when purchasing our products.

Learn more about our sustainability strategy at
www.hoermann.com/sustainability/

Photovoltaic systems on many of our buildings produce green electricity.

In addition to reducing emissions, we also create natural CO₂ reservoirs such as green roofs, bee meadows and pasture areas.

With the local production and process heat application of hydrogen, we are investing in green energy generation at our Ichtershausen site.

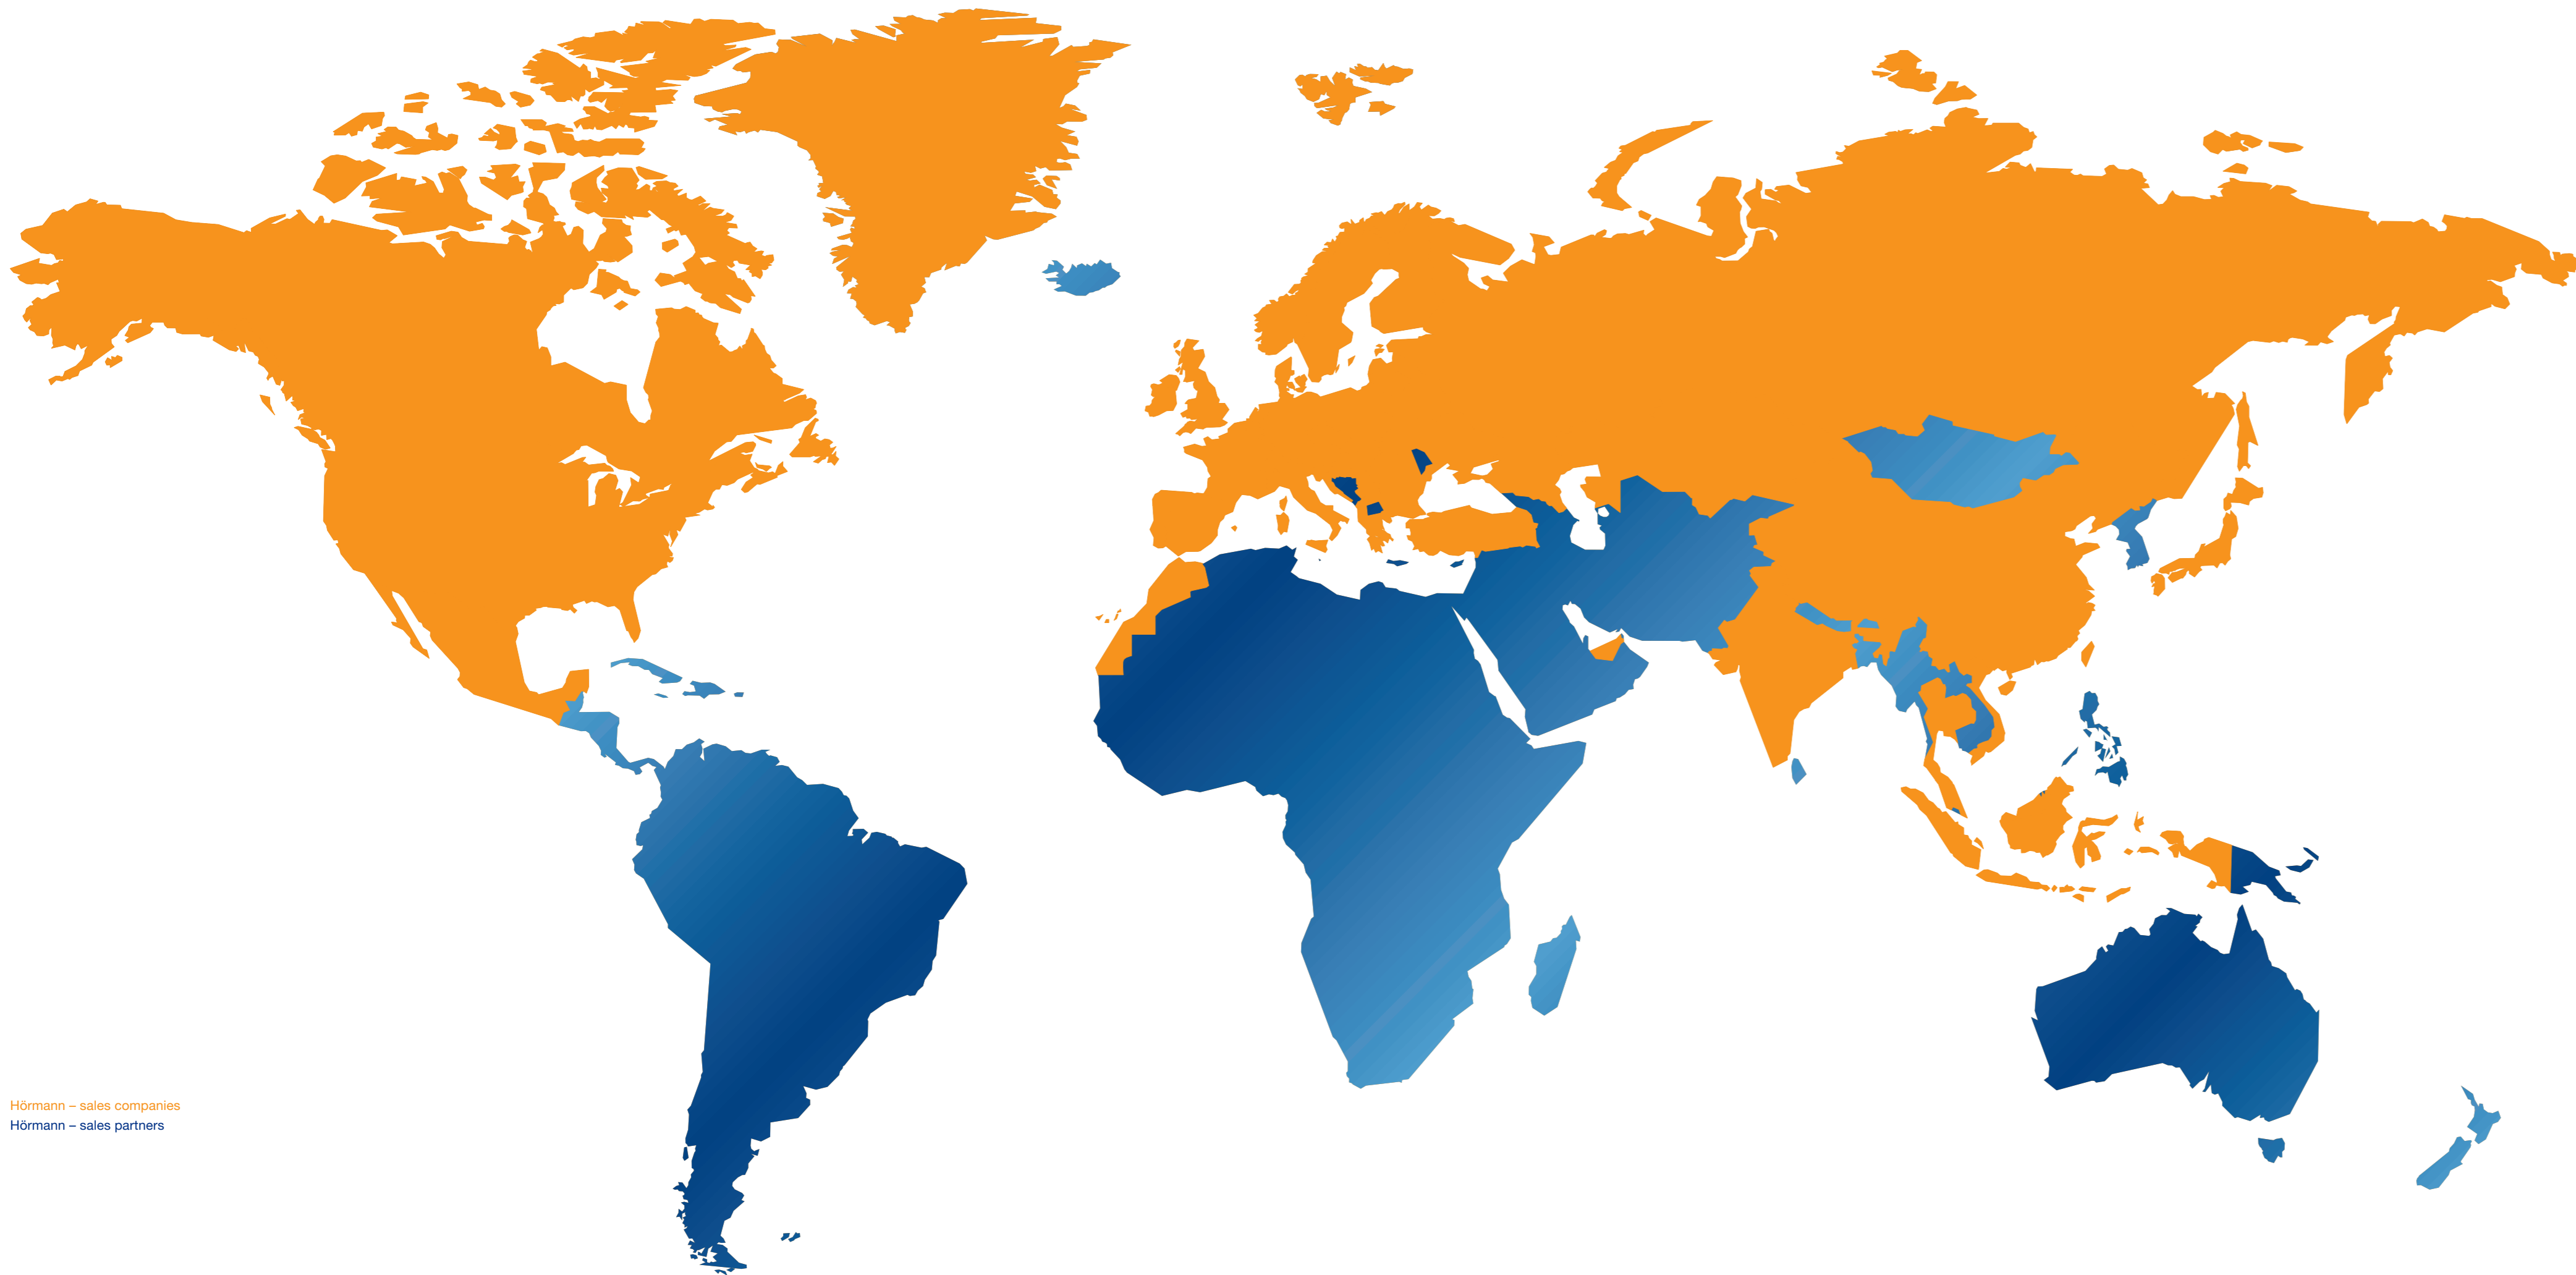

Less waste and more recycling – reusable packaging and production waste is processed and returned to the cycle of reusable materials.

SALES

Our products overcome borders, because they meet the highest demands and because they convince customers.

We are the market leader in Europe, our products are sold all over the world. This is ensured by our high-performance sales network with numerous sales companies and partners.

Hörmann – sales companies
 Hörmann – sales partners

SALES COMPANIES

Close to the markets. The sales companies form the backbone of our sales network. The foundation stone was laid with our dense subsidiary network in Germany. Locations outside of Europe were quickly added. The activities are coordinated by our central sales company in Steinhagen. The local sales teams act independently and on their own responsibility, as they know their customers and markets best.

HÖRMANN FORUM AND ACADEMY

Showroom and seminar centre. The Hörmann Forum presents our product world to visitors in light-flooded rooms spread over three floors. Because the products are fully functional, doors and much more can be truly experienced. It is also the central seminar and event centre of the Hörmann Group.

A leading edge through expertise. Qualified employees and partners ensure our success. Because we know this, we undertake huge efforts with trainings and seminars, with workshops and digital learning units. The offer ranges from fitting training to IT courses and legal knowledge transfer to the promotion of soft skills. The wide variety of services are bundled in the Hörmann Akademie.

In front of the Forum, visitors are welcomed by the “Large Kneeling Man”, a bronze sculpture by the sculptor Stephan Balkenhol.

On three floors and over 2500 square metres of exhibition space, a variety of doors and operators, loading technology and perimeter protection systems are presented.

The Hörmann Forum offers perfect conditions for seminars and training courses.

Training is offered at several locations.

SOCIAL COMMIT- MENT

Encounters between people. For us, success always entails responsibility. For our environment and towards society. And towards those who have not been so fortunate. In our commitment to disabled and chronically ill people, we rely on our competent partners. While the projects we support are inclusive, they do not view the relationship between those involved as merely one-sided, but rather as an opportunity for mutual exchange. Golf brings people together. Hörmann supports girls and boys with mental disabilities who dedicate themselves to sports with devotion and skill. At the Bielefeld Golf Club, students from Bethel enjoy professional guidance, compete in inclusive tournaments with other players, and participate in the Special Olympics. Other projects we support focus on culture and on building bridges between disabled and able-bodied people.

Helping people help themselves. Hörmann has had a production site in India since 2012.

The massive contrasts of the huge country are also evident at our location near the metropolis of Hyderabad. We produce there in an efficient and modern factory, while the surrounding area faces great social problems and infrastructural deficits. Again, we see it as our duty to help. We rely on experts from an Indian development agency and the German Association for International Cooperation (GIZ). The experts know best how to advance projects and offer help for self-help. For us, responsibility means above all strengthening people in their independence!
